

IMPORTANT: Due to constant improvements in vehicle design and quality, changes to a vehicle configuration may occur which can affect the Owner's Manual information after the supply for production has already been printed.

An error was discovered in the 2023 UFORCE 1000 Owner's Manual on page 58 after the supply was already inserted into production. The mode switch function has changed, with the modes being reverse of CFMOTO vehicles built in 2022 that have a mode switch feature.

2023 UFORCE 1000 Owner's Manual Page 58 – Part Number 5SYV-380101-6301-13 US228

CONTROLS AND FEATURES

Mode Switch - 12

WORK	When the switch is on this position, the vehicle is in 'WORK' mode. The dashboard display will also shift to 'WORK' mode. The vehicle will have a less aggressive throttle response for smooth starts and is intended for flat trails, hard pack ground, etc. Use for light-duty riding. NOTE: Do not use this mode for driving situations that place high load on the CVT belt. Damage may occur.
NORMAL	When the switch is on this position, the vehicle is in 'NORMAL' mode. The dashboard display will also shift to 'NORMAL' mode. The vehicle will have a faster throttle response. NOTE: Use this mode for work loads, complex terrain or trails, and other driving situations that can place a high load on the CVT belt.

Hand Brake - 13

This vehicle is equipped with an auxiliary hand brake, which is located to the left of the steering wheel. Pull back on the lever to apply the rear brakes and prevent the vehicle from rolling when parked on an incline. To release the hand brake, pull up slightly and press the release button at the end of the lever, then push the lever down to its original position.

⚠ CAUTION

Never depend on the transmission parking feature alone if the vehicle is parked on a hill. Always apply the hand brake and block the wheels on the downhill side of the vehicle to prevent movement. It is recommended to park the vehicle on level ground.

When the vehicle is moving and the hand brake isn't released completely, the speed will be limited to 7 mph (10 km/h).
