

**IMPORTANT:** Due to constant improvements in vehicle design and quality, changes to a vehicle configuration may occur which can affect the Owner's Manual information after the supply for production has already been printed.

An error was discovered in the 2023 UFORCE 600 Owner's Manual on page 63 after the supply was already inserted into production. The mode switch function has changed, with the modes being reverse of CFMOTO vehicles built in 2022 that have a mode switch feature.

**CONTROLS AND FEATURES**

**Mode Switch:**

<b>WORK</b>	When the switch is on this position, the vehicle is in 'WORK' mode. The dashboard display will also shift to 'WORK' mode. The vehicle will have a less aggressive throttle response for smooth starts and is intended for flat trails, hard pack ground, etc. Use for light-duty riding. <b>NOTE: Do not use this mode for driving situations that place high load on the CVT belt. Damage may occur.</b>
<b>NORMAL</b>	When the switch is on this position, the vehicle is in 'NORMAL' mode. The dashboard display will also shift to 'NORMAL' mode. The vehicle will have a faster throttle response. <b>NOTE: Use this mode for work loads, complex terrain or trails, and other driving situations that can place a high load on the CVT belt.</b>

**Turning Light Switch**  
(If equipped-available only in select countries)  
Turning light switch consists of 3 positions, choose the related position according to the function icons:

	When the switch is on this position, left turning light flashes.
	When the switch is on this position, right turning light flashes.
	When the switch is on this position, turning light is off.
